

## **Industrial Electric Rubber Finger Protective Cover**

KINGTOM is a leading China Industrial Electric Rubber Finger Protective Cover manufacturer, supplier and exporter. Finger Protective Cover Rubber play a hand or human body protection, made of rubber, latex, plastic and other materials, with electricity proof, waterproof, acid and alkali resistance, chemical, oil proof function.

KINGTOM is a professional leader China Industrial Electric Rubber Finger Protective Cover manufacturer with high quality and reasonable price. Welcome to contact us. **Finger Protective Cover Rubber** play a hand or human body protection, made of rubber, latex, plastic and other materials, with electricity proof, waterproof, acid and alkali resistance, chemical, oil proof function. Suitable for electric power industry, automotive and mechanical maintenance, chemical industry, precision installation.

### **Product Parameter of the Industrial Electric Rubber Finger Protective Cover:**

- ①Product name: **Industrial Electric Rubber Finger Protective Cover**
- ②Material: EPDM NBR Silicon or Can Custom
- ③Logo: Can Custom
- ④Size: Can Custom
- ⑤Can Custom: Black or custom
- ⑥Application: Automotive
- ⑦Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc
- ⑧Delivery: 30 -50days after sample confirmation
- ⑨Sample: 25-30 days
- ⑩Payment: 30% deposit, 70% payment before shipment
- ⑪Package: PE bags, Cartons,Pallet

⑫ Payment Terms: T/T,L/C and so on.

⑬ Shipment Way: Vessel,Air,Express etc.

### Product Feature AND Application of the **Industrial Electric Rubber Finger Protective**

#### **Cover:**

**Finger protective cover rubber** purpose is to prevent electric shock injury is mainly caused by the human body through the current, so the quality of the performance mainly depends on the size of the leakage current through a certain voltage, if the leakage current is within the range of the safety current value is safe, otherwise it is not safe. If a certain voltage is applied, too much leakage current can also cause human injury, although no breakdown is caused.

**Features:**

- ①resilience and fatigue resistance, because the rubber sleeve to expand and shrink operation, so the elasticity and fatigue resistance of rubber is particularly key, which lianxing rubber sleeve tensile strength reaches 10Mpa, elongation at break is > 600%. Permanent deformation is grade A.
- ②temperature resistance, because in some production links, the working environment is high temperature environment.
- ③oil resistance, because there are more oil in the field working environment, so oil resistance is also a parameter to consider.
- ④high friction coefficient, for loading and unloading links, friction is better for easy operation.

**Below is our industrial electric power silicone rubber parts:**
